Free Forensics 101 Mobile Crime Scene Experience for Public School Science Classes

Forensics 101, Inc is a nonprofit science enrichment organization dedicated to offering a wide variety of forensic science workshops, classes, camps and crime scene experiences for the advancement of science education.

Forensics 101 understands that in these economic times, educational institutions are feeling the effects of budgetary constraints. Forensics 101 believes that regardless of financial situations, science should remain at the forefront of every student's academic career, and we would like to help... for FREE.

With the help of donations and sponsorships Forensics 101 will offer our mobile crime scene experiences for free to public school science classes. Teachers will follow their current forensic science curriculum or work with Forensics 101 to develop a forensic science curriculum. At the end of the forensic science unit, Forensics 101 will work closely with teachers and school officials to bring a dynamic mobile crime scene experience to students that is both hands on and exciting. These crime scene experiences will be unique and will be based on the curriculum that students recently completed in the classroom.

Our mission is to not only educate, but to stimulate a sense of excitement about science and to encourage continuous learning and advancement in science.

We are currently collecting information from interested teachers and/or school officials who are interested in a FREE Forensics 101 Crime Scene setup for the 2010-2011 school year.

Please print the attached questionnaire and mail or fax it back to Forensics 101.
